

## Upper Captiva Fire and Rescue Nov 17th Chief's Report.

- We have responded to 3 EMS and 0 FIRE calls in the last month. 51 total calls for the year.
- There have been 0 capital purchases or disposals.
- The Gym is complete and the equipment is on the island being assembled.
- The bunker gear room has been completed.
- The Command staff meeting on the 21st went. DC Trujillo has decided to step down from his position. We thank him for everything he has done for the department. The remaining command staff met and decided to promote LT Dan Garretto to DC EMS. He will do an exceptional job. DC Garretto has been employed with UCFRD for 10 years; he's been a state medic since 2010. He is an instructor who will keep all our retired guys certs current. He is active with USAR. The man holds many certs. We are lucky to have him.
- DC Doerr will have a presentation to present for new SCBA packs and bottles as well as a replacement plan. At December's meeting.
- I have received one quote from A&E for the West Stairwell and the AC platform. Pedro with Verona will be by 11/16 and provide a quote. Spoke to Phil Heebner he stated he would be by next week to inspect and provide a quote as well. I will have all 3 quotes to present at December's commissioners meeting. I apologize for the delay. Island time is a real dilemma.
- Island Girl has provided a "New" contract. It would consist of 39\$ round trip and 5\$ per vehicle. This is if we continue to utilize Island Girl. I have spoken to Tarpon Lodge. Mr Wells is a very nice man but does not have any slips currently available. I pondered calling Four Winds the added time on a boat may create a shift change issue as

it will add roughly 10-15 minutes to the trip. I will call the CO-OP and see about that option as it's a more direct route. I know NCIC utilizes this route and I can speak to Corey, the NCIC Captain. He and I go back. We used to dive together about the route.

- Questions Comments Concerns.....
