

Chief Report for 9/21

- Total Calls YTD 43 calls 31 EMS vrs 12 Fire/odor investigations/good intent calls/Shore Command
- 0 capital expenses 0 Disposals
- Got a call from Noah Safety Harbor GM stating our lift station was not operating. Called JJ and had him take a look at it. 1st problem was a tree causing issues that needed to be removed. I contacted Sherman. He cut the tree down and cleaned out the root system. JJ then showed back up and stated the job was too big for him. So I contacted the same company who installed the system safety harbor has I was quoted that the worst case scenario is 100K which is a new lift station. I will get a quote from multiple vendors. We have one pump operating currently. The other option is septic and well which will then allow us to come off the 1700 a quarter we pay Safety Harbor. Still early just want y'all to know.
- I will be off island 23rd-29th. My grandma had surgery. She will be admitted to a rehab. I just need to be present there to help my family.
- Platform for the fill station is ready for installation. Will work on electrical next.
- Permit has been pulled for the remainder of station rebuild. I believe work will commence 10/1.
- 26K boat check has been deposited to the money market account 10/19.
- The district will support breast cancer month along with prostate cancer month with shirts. We will also have some for sale for the public.
- LT Whitlock attended a honeywell class. While he was there I asked him to make contact with a sales rep about a lightly used 5 gas meter. The sales rep provided a demo at no cost to us for the unit, It will allow us to check air quality if someone should have an odor they are concerned about. LT Whitlock also is capable of repairs and maintenance to the unit. Thank you LT Whitlock!!!!
- Any Comments Questions Concerns
