

Chief Report

Chief Report for 2/21/25

- Total Calls for the 2025 7 EMS 0 Fire
- 6 EMS call this last month
- 2 capital expenses 0 Disposals
- Lift Station 13K and 5K for repairs on Transport
- We have had a few FFs resign, none left on bad terms just had life and unable to provide the normal availability. We are still in good shape on staffing.
- 1- Ford F450 4X4 Ambulance/Transport SWEV has repaired the airbag system similar to suspension. I am sending the cost to the seller as it should have been repaired before selling.
- PGIT has finished the report on Tractor, Roxor, Kawasaki, and the pump on trailer hopefully close out this upcoming week.
- New cabinets have been installed in the kitchen. I have received 4 quotes on paint interior and exterior. If you desire to see the quotes I will provide them.
- Equipment/Units Update Tender 191 has been placed in service. I want to thank North Captiva Barging for the complimentary voyage out. Transport 191 will be barged out next week. Thank you NCBC for the assistance with this unit also.
- We need to discuss at least 1 more unit. I will present a couple different options. I understand insurance is not a one to one cost. The district needs either a hybrid engine/tender or an additional engine immediately due to both forestry vehicles being unreliable. Forestry will take them back. I need to work on removing the tank and pump off one and the skid off the other. I have a few pics and quotes to discuss.

Any Comments Questions Concerns
