

# Chief Report

## Chief Report for 7/18/25

- Total Calls 37 for the 2025 35 EMS 2 Fire
- 6 EMS call 0 fire calls this last month
- 1 capital expenses 0 Disposals
- Purchased a used side by side for 5K as the mahindra is becoming concerning. We will look at repairing the mahindra off island to extend the life of the unit.
- We have received the final 2 checks: 29K from PGIT and 36K from VFIS. Both checks have been deposited to the MM account.
- T192 had a bad starter and it has been replaced. We are assessing if it has any other mechanical issues. When you buy used equipment it can be a gamble.
- E191 has been taken off island and it has a few minor repairs being addressed. The shop has moved us to the front of the line. They understand we only have one engine.
- The condo repairs have begun today 7/16. The AC has been addressed and the technician believes we can keep it running for a year. The total cost will be roughly 10K. This will be applied to repairs and maintenance.
- My last shift in Bonita is 7/19. I will be catering a dinner at station one. If any of you want to come please know you are invited.
- The station bay doors are installed and almost complete. They have to come out next week to install some lag bolts.
- I have received a few renderings of potential chiefs quarters. I will provide them at the meeting.
- I have started communication with a lobbyist I met at the conference who helped other fire districts with state and county grants. I believe we should qualify for some county grants. I received an email from Ben Abes regarding the county grants. None of my current communications have cost the district anything.
- Bill, Crystal, and I will do our best to close out the Ian FEMA claim over the next several weeks. I honestly believe we can make this happen.

- I have a conference call with a FEMA representative at 2pm on 7/17. I will provide a verbal update at the meeting.
