

January Chief Report

- Emergency calls YTD-9 EMS-4 Fire-5
- Discussion of fire at end of report please.
- T191 and B191 are out of service both pumps are inoperable. T191 pump is still under warranty I asked the company who built it what would cause the pump to explode like it did the answer was freezing temps and us running it hot in those freezing temps. Well, that is obviously not the cause so they are unsure how it happened. B191 has an ongoing issue with pump it has been investigated several times each time they assure me it has been repaired. I will be in touch with South Florida Emergency Vehicles who did the install of pump and tank.
- Quick Books has given me two reasons we aren't able to verify the bank account. One I am not a signer on account the other bank is not verified properly. I will address that this Monday.
- Tractor fundraiser has not been promoted on Facebook as of yet. Duncan and I have spoken about this and will work on getting this out there ASAP.

Van, JD Porter, Alex Murphy and myself had a meeting discussing collaborating with UCCA to help raise funds.

- Comments Questions Concerns.....
